

**C4E Forum, Samorin 23-26 May 2023**

**Session 1a – Supporting a green and resilient reconstruction of Ukraine, 24 May**

Purpose of the session:

to have a discussion portraying the Ukrainian perspective on the reconstruction of the cities and areas damaged by the war, enriched by strategic considerations on how to secure a green and resilient reconstruction.

The session will aim at contributing to the following long-term objectives:

- Support Ukrainian stakeholders in making the case for green and resilient rebuilding.
- Support the discussion on a green and resilient reconstruction of Ukraine at EU level and what role member states can play.
- Contribute to the discussion about the design of reconstruction programmes of major donors, including EU institutions and national donors

The following elements are integrated into the design of this session:

- Overview of the state of play of the discussion about (green) reconstruction
- Presentation of a selection of recent studies and programmes about energy efficiency and green reconstruction opportunities in Ukraine
- Panel discussion about ways and strategies to support Ukrainian stakeholders and partners for a green and resilient reconstruction.

| Time          | Topic and speaker   |
|---------------|---|
